PROJECTS

Online Banking System

Security-focused Python application for online banking platforms

- Developed a Python-based system to detect and mitigate DoS, phishing, and malware attacks in online banking platforms.
- Implemented AES encryption to ensure secure data transmission and protect sensitive user information.
- Built a custom Chrome extension to detect phishing websites in real-time, enhancing user safety during financial transactions.

Online Therapy System

Web-based mental health support platform connecting users with therapists

- Designed responsive UI for user onboarding, therapist profiles, and appointment booking.
- Focused on privacy-aware design and accessibility-friendly interfaces.
- Aimed to improve access to mental health services through technology.

Online Voting Management System

Web-Based application that allows students to vote digitally

- The system allows students to securely log in, view candidates, and cast a single vote, while the admin can manage candidates, monitor participation, and control the voting process.
- The secure vote processing and results module ensures one-vote-per-student logic, safely stores votes, and allows the admin to view real-time or final results.

EDUCATION

JHULELAL TRUST SCHOOL & JUNIOR COLLEGE ***Sep 2020 - Jun 2021***

Completed SSC from Jhulelal Trust School & Junior College with an excellent academic score of 89%.

R. K. TALREJA JUNIOR COLLEGE ***Jun 2022 - Jun 2023***

Completed HSC from R. K. Talreja Junior College with a commendable academic score of 72.17%.

CERTIFICATIONS

- **Python:** Completed structured Python training at EduPyramids, SINE IIT Bombay, gaining hands-on experience in core programming concepts and problem-solving (Score: 65%, May 2025).
- **Java:** Successfully completed Java training under the Spoken Tutorial Project, IIT Bombay, with practical exposure to object-oriented programming and basic application development (Score: 62.5%, Oct 2024).

TECHNICAL SKILLS

Programming languages: HTML, CSS, Python, Java, JavaScript, NodeJS
Databases: MySql, Mongodb
Frameworks: Tailwind, Express, React
Operating Systems: Linux based, Ubuntu
